

Top Tips for successful Grant Applications

We recognise the essential role that early years, childcare and playwork settings play in the foundational economy and to children's wellbeing. As a result, numerous grants are being made available. Funding may be capital or revenue and can assist with sustainability (especially considering challenges presented by Covid-19) or to improve quality of resources.

Here are our Top Tips!

Read the guidance

This will highlight what the grant can be used for, how much is available, who can apply, what additional documentation you must provide, and when the deadlines are. A grant panel usually makes decisions on your application against the grant guidance and criteria. **Allow plenty of time, plan your application, don't rush it and do your research.**

Check the criteria

Do you meet the criteria? For local authority funding, settings will generally need to be registered with Care Inspectorate Wales (CIW). There may be other requirements linked to specific funding, such as being registered for the Childcare Offer if applying for Childcare Offer Capital Grants or being a registered charity. Make sure that how you want to spend the grant fits the grant criteria. **Think about need not greed.** It's important that the grant fits your needs and that you don't alter your plans or aims to fit the grant! Don't waste your time on proposals that aren't a good fit. **If you're not sure, pick up the phone and speak to the funder.**

Closing date

Check the grant closing date. Funds are limited and many grant schemes operate on a first come first served basis, so **apply as soon as possible.** Check how they want the application form to be completed – for example typed and sent by email. If you are waiting on quotes or other supporting information, contact the funder and explain.

Application form

Read the application carefully and note any information you will need. **Be clear and concise** about why the funding is needed and state how it will benefit the children in your care. Are questions scored? Remember, the higher the score, the more information you need to provide! Don't waffle! Stick to your aims, objectives and outcomes. Remember to **sell your setting and your plans.** The grant panel may know nothing about you. Be prescriptive and passionate! Read the application before submission, ensuring you have completed all questions and attached all required information. **Follow each and every instruction.** If you are not sure, ask! If your setting is run by a committee, ask for support from others on the committee.

Top Tips for successful Grant Applications

Legal and financial information

You will usually need to include financial information about your childcare business so that funders can ensure public money is allocated and used properly. Make sure your annual accounts are signed and dated, bank statements are no more than 3 months' old, and the name of your organisation is the same on your bank account. You may also need to provide a financial forecast. **Your national childcare organisation can help you with this.** If you run multiple settings / services but have one set of accounts, it will be useful to provide separate management accounts or supplementary information to provide clarity about the financial situation of the setting/service seeking funding.

Supporting information

If applying for capital funding to improve a specific area within your setting, you can **provide photographs** of the existing area and links to items you want to purchase so that a grant panel can evaluate quality and value. If available, include feedback from children, parents, CIW or other professionals that support your plans. You will often be asked for up to 3 separate quotes for more extensive work. You may also be asked to provide your governing document (e.g. Constitution or Memorandum and Articles of Association) as well as specific policies and insurance policy details. **Never** send the original governing document as funders will always ask for copies.

Do final checks

Proofread, spell check and remember to sign and date. Stick to specified formats, remember the little things count. **A well-presented application** will help show your commitment and promote your setting to the grant panel.

Further help

Local authorities usually distribute funding made available to the sector by Welsh Government. Check websites, sign up for updates and contact them.

Cwlwm partners have further resources and can support settings.

Business Wales provides financial support and advice.
